

## **The Goal of my Responsive Website entitled: “Historical Manhwa Recommendations”**

To create a paradigm-shifting platform that transcends the boundaries of storytelling, reshaping how humanity perceives history, art, and cultural identity through the lens of historical manhwa. This website will explore the genre not just as a form of entertainment but as a profound medium that reclaims silenced narratives, reinterprets historical truths, and interrogates the interplay between fact and imagination. By diving into the philosophical underpinnings of historical manhwa—its ability to reflect human struggles, challenge societal constructs, and illuminate timeless truths—the platform will invite readers to see history as a dynamic and participatory experience. Through thought-provoking content, immersive analysis, and a thriving community, the website will aim to inspire a global movement of introspection, fostering a collective understanding that history, much like manhwa, is not just something to be learned but something to be lived, questioned, and reimagined.
