

CakeCraft Website Documentation

About the Website

Welcome to *CakeCraft*! This is a simple website about the Minecraft cake and how you can make it in the game, as well as order real cakes inspired by the Minecraft cake. It's a fun mix of video games and cake, made for Minecraft fans and cake lovers.

Goals

- **Learn about the Minecraft Cake:** I want to teach people about the Minecraft cake, how it works in the game, and why it's so popular.
- **Minecraft Cake Instructions:** I provide easy-to-follow instructions on how to craft the cake in the game.
- **Order a Real Cake:** You can also order real cakes inspired by Minecraft cake designs, like Chocolate or Vanilla.

Website Sections

Here's what you can find on the website:

- **Header:** At the top, there's the title "CakeCraft" – that's what the site is called.
- **About Cake:** This section talks about the Minecraft cake, how you make it in the game, and why it's so cool.
- **Types of Cake:** There are pictures of different cakes – some from Minecraft and others that are real-life cake designs based on Minecraft.
- **Cake Instructions:** If you want to know how to make the cake in Minecraft, I have step-by-step instructions here.
- **Order Cake:** If you want to order a Minecraft-themed cake, there's a button for that. It'll open a small window where you can choose the cake flavor (Chocolate, Vanilla, or Triple).
- **Footer:** At the bottom of the page, you can find my email if you want to get in touch.

Features

- **Cake Instructions Toggle:** I added a button to show or hide the cake-making instructions. This makes it easier to read.
- **Order Cake Modal:** When you click the "Order a Cake" button, a small window pops up where you can select a cake.
- **Transitions:** I've added a smooth transition effect for links so that the site looks a little fancier.

Design

I kept things simple and tried to make the site look like Minecraft, so it's fun and colorful. The website adjusts to different screen sizes (so it looks good on both phones and computers).

Technology Used

- **HTML5:** I used basic HTML to structure the page and make sure everything is in the right place.
- **CSS:** For the look of the website, I used CSS to style things like the text, images, and layout.
- **JavaScript:** I used a little JavaScript to make the site interactive, like showing the cake instructions and opening the order modal.

Future Ideas

- **More Cake Options:** I could add more types of cakes that you can order.
- **Reviews:** Maybe I could let people leave comments about the cakes they order.
- **Minecraft Events:** I'd love to add something where people can enter Minecraft-themed cake challenges.
