## Goals and Plan for Website

The website is about the art gallery of famous artists and their works.

### Goals:

- The website should showcase different art masterpieces.
- The website should also include artist profiles.

### Plan:

- Website Layout
  - The homepage will have navigation links to different sections.
  - Each artist will have a dedicated page that includes a biography, a timeline of their works, and detailed analysis of their most iconic pieces.
  - Ensure that the website will be responsive.
  - The structure of the site will be built using standard HTML5 for content, CSS for styling, and JavaScript to add interactivity.
