

Name: Lara Rain B. Fuentes

Course Code: ICT 01

Year/Course/Section: 1/BSCS/A

Date: 12/05/24

MY GOAL FOR MY WEBISTE

My website is all about Studio Ghibli movies.

Goals:

- My website should show at least have 3 trailers of the movies.
- My website should also have the synopsis of the movies and given links of the movie should be accessed.
- My website should have contacts that will able to reach me for suggestions.

Plans:

The Studio Ghibli Movies website is built using HTML5, CSS, and a touch of JavaScript to create a visually engaging and responsive user experience.

1. Header and Navigation:

- A responsive header with a navigation bar, including links to Home, About, Movies, Trailers, and Contact pages.
- A toggle menu for mobile devices using icons and JavaScript to show or hide the navigation links.

2. Movies Section:

- Cards or columns for displaying different movies with hover effects for interactivity.
- Clean layout with responsive design to maintain structure across devices.

3. Footer or Icons:

- Social media links (Facebook, Instagram, Email) styled as clickable icons for user connection.

4. Mobile Responsiveness:

- Custom media queries for devices with screen widths under 700px, ensuring the layout adjusts gracefully for smaller screens.
