

My Goal for My Calligraphy Website

My website is all about calligraphy, offering resources for learning and practicing this beautiful art.

Goals:

- My website should have at least 2 video tutorials showcasing calligraphy basics. My website should include a comprehensive list of calligraphy materials .
- My website should have a dedicated section for sharing other knowledge related to calligraphy, such as lettering techniques, script variations, and design inspiration.
- My website should have an active community forum where users can ask questions, share their work, and discuss calligraphy with other enthusiasts.

Plans:

- Header and Navigation: A responsive header with a navigation bar, including links to Home, Tutorials, Materials, Info, and Other Knowledge sections.
- A toggle menu for mobile devices using icons and JavaScript to show or hide the navigation links.
- Tutorials Section: Clear layout with responsive design to maintain structure across devices. Videos showcasing calligraphy basics, lettering techniques, and specific script tutorials.
- Materials Section: Cards or columns displaying different calligraphy materials, including inks, nibs, pens, paper, and tools.
- Links to trusted online retailers for purchasing these materials.
- Info Section: Text-based content with images and videos to provide information about calligraphy history, styles, and famous calligraphers. Well-structured content with headings and subheadings for easy navigation.
- Other Knowledge Section: Content covering topics like script variations, lettering design, and calligraphy-related design inspiration. Visual elements like images, videos, and infographics to enhance user engagement.
- Footer or Icons: Social media links (Facebook, Instagram, Email) styled as clickable icons for user connection. Mobile Responsiveness: Custom media queries for devices with screen widths under 700px, ensuring the layout adjusts gracefully
