

## *Goals and plan for my website*

My goal for the website I am planning to create is to develop a comprehensive guide specifically designed for students like me who have a passion for makeup. Through this platform, I aim to share my personal experiences, tips, and knowledge in a way that resonates with fellow makeup enthusiasts. By combining makeup advice with motivational insights, I hope to inspire students not only to enhance their creativity and skills in makeup but also to build confidence that extends to other areas of their lives, including their studies.

With a balanced approach, my website will encourage students to embrace their passions while maintaining focus on their academic goals. The content of my website will include knowledge I've gained from W3Schools, such as responsiveness, formatting, and styling. Additionally, it will feature various sections, such as *About*, *Gallery*, *Tips*, and more. Each section will serve a unique purpose while contributing to the common goal of teaching and empowering my fellow students. Whether it's learning new techniques, finding inspiration, or building self-assurance, the website will be a space for students to grow both personally and academically.
